

INTERNATIONAL **ALCHEMY** CONFERENCE

Where change happens.

{ PROGRAM BOOK }

TO THE CITIZENS of the great City of Los Angeles and to all of those who traveled from afar to be here, Welcome to The Third Annual International Alchemy Conference.

This annual event is produced jointly by the International Alchemy Guild and The Modern Mystery School. The Guild is a non-profit membership organization dedicated to preserving the ancient teachings of alchemy. The Modern Mystery School offers advanced spiritual training in the ancient lineage of sacred wisdom transmitted through the great masters.

The goal of our work is to empower individuals with the highest level of spiritual growth, coupled with practical knowledge, so as to change our personal reality and thereby transform the world.

This weekend holds a promise for our world. It is the promise of hope and possibility. By coming together this weekend to hear the wisdom of these exceptional teachers, we are collectively diving into the solution to our world's biggest challenges.

We are held together by the sacred thread of life. Our joys are shared joys. Our successes are shared successes. Our challenges are shared challenges.

Please open your heart and mind and receive these teachings with the intention of taking them back into the world, so as to uplift those you come in contact with. This way, when we meet again next year, we can marvel together at the progress that has been made.

Thank you for your commitment and support.

May this and every day be a blessing for you and everyone on this Earth, Sincerely,

THIS YEAR'S ALCHEMY CONFERENCE could not have happened without the support of many individuals and organizations that contributed in both large and small ways. We truly have witnessed what happens when the synthesis of many unite to accomplish the miracle of one thing.

and we give special thanks to:

OUR MANY VOLUNTEERS

TO ALL PRACTITIONERS of the hermetic arts that through the ages have toiled in obscurity, fame and persecution, to keep the flame of truth alive so we of future generations would be able to use it to ignite our transformation.

To the sponsors, presenters, exhibitors, participants and volunteers of the first two International Alchemy Conferences. Thank You for creating the foundation on which we continue to build a community committed to change in our world.

To John Iammateo, Antonio Canales, and Hideto Nakagome for making the Golden Pyramid of Peace possible.

To Eiko Gudnason and Yuka Nakajima who have been amazing in creating the new structure for the Shamballah Tribal Community. A structure that is supported through their dedication and commitment to the great work.

WHITE GOLD, MONATOMIC ELEMENTS, AND ORMUS – PART 1 OF THE ORMUS WORKSHOP

Barry Carter presents his current research into monatomic elements. These m-state elements have been observed to exhibit the quantum physical behaviors of superconductivity, superfluidity, Josephson tunneling, magnetic levitation, and there is evidence they are associated with "dark matter" or the First Matter of the alchemists. It looks like they are an entirely new class of materials. Several of the procedures for extracting or making ORMUS have been adapted from ancient alchemical texts, and the Philosopher's Stone and the Biblical manna may be variations on this state of matter. Part 2 of this workshop will be offered by Don Nance on Saturday, October 24 from 2:30 – 3:45 pm.

QUANTUM ALCHEMY

REDEFINING ALCHEMY FOR THE 21ST CENTURY

Physicist Theresa Ibis, Ph.D., takes a modern view of alchemy in this fascinating presentation. Does Alchemy have a place in today's world? And if so, what does 21st Century Alchemy look like? In this presentation, Dr. Theresa Ibis will help you more easily understand the basic foundations of Quantum Physics and the Standard Model that is the backbone of today's science. She will additionally reveal how Ancient Alchemical models correlate with today's scientific models of the Universe. With this knowledge, we are able to draw new insights for truly understanding how to harness consciousness in order to affect transformations at the quantum level. Alchemy holds the keys to not only this understanding but also practical methods whereby we can harness consciousness itself to influence the material world, all the way down to the quantum level.

PRACTICAL ALCHEMY WORKSHOP – PART 1 OF 2

Formal instruction in basic and advanced techniques of spagyrics will be offered to the first 50 registrants by Robert Allen Bartlett, former chief chemist at Paralab, the commercial offshoot of Paracelsus College. Spagyrics (spa-gr-i-ks) is a Greek word meaning to separate and recombine. Spagyrics was the basis of Paracelsus' work and he is often considered its father. The spagyric process is a three-fold process of separation, purification, and cohobation (reunion of the purified parts). During the process, the essences of the substance are exposed and reborn under planetary influences. The spagyric product is considered to be at a higher level of potency able to effect not only the physical body but also the underlying or spiritual cause of disease. Part B of this workshop is offered on Sunday, October 25 from 11:15 am – 1:00 pm.

TOAIST INTERNAL ALCHEMY

Master Mantak Chia shares the secrets of Taoist alchemy. Through learning to nurture and heal oneself a solid foundation is laid for the realization of one's spiritual potential. By re-establishing a direct connection with the natural energies surrounding us, the subtle awareness necessary for spiritual progress arises spontaneously. Ultimately, the boundaries of the physical body are transcended by the development of the soul and spirit bodies. Though self-healing, the healer is born. Once the energy channels, or meridians, of the body have been opened and the energies of the internal organs harmonized, this unique integrated energy becomes available to heal others. Then, by opening and connecting to the sources of energy around us in Nature and the Universe beyond, boundless healing power becomes available for the benefit of all. A book signing by Master Mantak Chia will be held in this room from 6:45 – 7:15 pm.

HOW ALCHEMISTS ACHIEVE TRANSFORMATION

Dennis William Hauck reveals the specific methods and secret operations used by alchemists to accomplish their transformations. These universal operations apply on all three levels of reality (the physical, the mental, and the spiritual). In this lecture, he traces the process of transformation through the three phases of the Work (the Black, White, and Red phases) and shows how each stage has its own goals, procedures, and conclusion. The Great Work of alchemy followed a secret formula of repeated operations performed on different levels that culminated in the creation of the Philosopher's Stone. The essence of this magical touchstone was the alchemist's own purified and empowered consciousness. That slow and deliberate process of perfection is the subject of this presentation.

REVOLUTIONARY NEW SCIENCE: THE NATURE OF SPIN

Nassim Haremein has engaged in a lifelong exploration into the geometry of space-time that has lead to a coherent understanding of the fundamental structure and model of our Universe and of our existence in it. In this presentation, Nassim will take you on a fantastic journey through the history of humanity's evolution, reflecting on the changes necessary to produce a true view of Unification, one that unifies not only the four forces of nature, but also biological evolution and the occurrence of consciousness. Nassim also demonstrates that this new all-encompassing theory seems to have parallels with ancient codes left in documents and colossal monuments around the world as the tale weaves between the sciences of physics, chemistry, and biology, and then to the wisdom and codes of the ancients.

ALCHEMICAL GODS OF EGYPT

Dr. Thom Cavalli takes a look at the deeper energies involved in alchemy in this presentation on the one and many faces of the archetypal alchemical myth. In every major alchemical epoch, we find a major deity who presides over the Work, inspires the adept and even enters the vessel as the necessary spiritual catalyst. As we study each of these numinous deities we will be asking questions that are important to all practitioners of the Work. Why does the Art require any god at all? How do these gods function in our work? Do they merely exist in our mind or are they found in our substances and operations? Are the gods immortal? How might we pay them homage? By asking these and other questions, we hope to receive sacred knowledge that will bring forth the divine ingredient that informs our work and infuses our lives with great, transcendent value.

**ALCHEMY MEETS MODERN TECHNOLOGY –
TRANSFORMATION VIA THE HUMAN ALGORITHM**

Alchemy has truly come of age through fusion with modern technology. According to neuroscientist Don Estes, this magical blend of the old and new has propelled the art to a whole new level and greater understanding of the harmonic laws involved in its operation. The principle goal of alchemy is transformation via manifestation of intention, and the chance that materialization will actually occur is directly proportional to the quality of expression. The algorithm of spectral transformation perfectly describes the process of ascension to the highest level of order. Following these instructions results in the resolution of the difference between actual and potential and provides all of the resources necessary to complete the journey. This technique can be utilized to transform human beings by requiring them to become the agent of their own reassembly.

THE ALCHEMY OF HARRY POTTER

What is the secret of the most popular book ever published? Hans Andrea is convinced that hidden under the magic, mystery and excitement of the series there is a profound and powerful spiritual symbolism that resonates with the archetypes of the collective unconscious of many millions – especially children – all over the world. This symbolism carries the one timeless and universal message: liberation from evil, suffering, and death. Hans will show that Harry Potter has a remarkable number of similarities to the alchemical masterwork The Chymical Wedding of Christian Rosycross (published in 1616). In addition, he will show that Harry Potter is saturated with alchemical symbols. In the second half of his lecture Hans will summarize the actual message of alchemy from a Rosicrucian point of view.

**TRANSFIGURATION ICONS –
SECRETS OF THE PHILOSOPHER'S STONE**

The alchemist's quest for the Philosopher's Stone begins with the realization that everything can be transformed or transmuted. Thoughts can become things. Lead can become gold. A human can become a star. This alchemical mind-set was adopted by the icon makers, especially of the 14th-17th century. An icon is a sacred image that is believed to be charged with spiritual power. In particular, icons of Transfiguration or Metamorphosis were considered two-way channels of transformative energy. They are sacred mirrors and gateways to other realms. In this profoundly illustrated presentation, investigative mythologist and author, William Henry, presents a one-of-a-kind collection of Transfiguration icons from the ancient and modern world. He takes us deep into this lost 'soul alchemy' to reveal the alchemical symbolism and instruction contained within this imagery and how it can transform us.

ALCHEMY DISTILLATION DEMONSTRATION

This live demonstration and lecture by Gary Stadler, working renditions of glassware used by Medieval alchemists as well as modern variations on the equipment will be featured. One of the distillers presented is the famous Pelican, which is a circulatory distillation vessel with two side-arms feeding condensed vapors back into the body. It resembles the mythic pelican pecking at its breast to feed its hatchlings with its own blood, and thus is a symbol of the sacrifice the original solution goes through to give up its essence in the experiment. Also featured will be original distillers designed by Gary for use in essential oil and hydrosol production. His vertical distillers are specifically designed for easy steam extraction of essential oils from plant materials and are extremely popular among practicing alchemists around the world.

Created by a group of artists in collaboration, each element of its design and construction incorporates advanced concepts we see as models for future human development. One example of this is that we see a trend in modern times which blends the wisdom, values, and cohesiveness of past societies with the technological advents which afford us the freedom of movement and communication we experience in today's world. We have designed adventures through science, rhythm, music and frequency patterns that immerse the audience in playful interactive opportunities to learn and grow.

THE HIDDEN MESSAGES OF WATER

Dr. Masaru Emoto reviews his latest research into the amazing ability of water to "change its expression" in response to human thoughts and emotions. His work has reaffirmed the alchemists' belief that water is alive and challenges the way water is abused globally, stripped of the sacredness that indigenous cultures across the world have always attributed to water. Dr. Emoto acknowledges his role as a "messenger" with the mission of going throughout the world to raise the level of awareness concerning water and heal the earth's water. His groundbreaking work changed most of what we thought about water and has led to a new consciousness of earth's most precious resource. The implications of his research create a new awareness of how we can positively impact the earth and our personal health. A book signing by Dr. Emoto will be held from 7:00 – 7:30 pm.

BODY, SPIRIT AND SOUL: A SPAGYRIC PHILOSOPHY OF NATURE

Paul Bartscher and Micah Nilsson present the alchemist's view of Nature in this riveting lecture. Modern science and philosophy draws a line through Nature's creation: on one side is the human realm of spirited and ensouled beings, while across the divide lives everything else in a state of purely physical existence. Alchemical and Spagyric philosophy is rooted in a time when all of Nature was understood to contain body, spirit, and soul just as we do, from the active world of animals down through plants and even to the quieter mineral kingdom. Alchemy and Spagyrics offer powerful ways of connecting with our forgotten Western lineage of vitalist and magical connection to nature, as well as giving us ways of moving that lineage forward into a re-enchantment of matter itself.

Specifically Gur which was obtained via herbal distillates from a selection of plant species. In relation to these experiments the use of a lightning still and the process of electro-distillation will be discussed, as well as the 4x3x4 fractional distillation technique – a technique adapted from The Golden Chain of Homer, and the production of Angel Water via the use of a customised glass Kerotakis.

PRACTICAL ALCHEMY WORKSHOP – PART 2 OF 2

Formal instruction in basic and advanced techniques of spagyrics will be offered to the first 50 registrants by Robert Allen Bartlett, former chief chemist at Paralab, the commercial offshoot of Paracelsus College. Spagyrics (spa-gr-iks) is a Greek word meaning to separate and recombine. Spagyrics was the basis of Paracelsus' work and he is often considered its father. The spagyric process is a three-fold process of separation, purification, and cohobation (reunion of the purified parts). During the process, the essences of the substance are exposed and reborn under planetary influences. The spagyric product is considered to be at a higher level of potency able to effect not only the physical body but also the underlying or spiritual cause of disease. Part 1 of this workshop is offered on Friday, October 23, 2009 from 3:30 – 5:00 pm.

GLOBAL ALCHEMY AND OUR INTER-DEPENDENT DESTINY

Dr. Alfredo Sfeir-Younis takes a global view of the power of alchemy in this presentation. It has become relevant to address what nurtures the transformational forces and alchemy of economics, business and public policy. Experience demonstrates that the alchemy associated to those processes is individualistic and egotistic in nature with a strong universal character (globalized). These patterns of material alchemy embedded in notions of material scarcity in the satisfaction of human needs— must be changed, and a new alchemy must emerge. This is to be nurtured by higher levels of collective consciousness and by a greater awareness of our power of interdependence: human interdependence, nature's interdependence, and spiritual interdependence. These form the trilogy of The New Alchemy, which enables us to create a human destiny with less poverty, environmental destruction, war and conflict and human insecurity. Furthermore, most of the attention must be on the union of body, mind and spirit with a special emphasis on the sacredness of our body geometry. There is a global alchemy emerging to enable a global being to rise from the ashes of individualism.

HANS ANDRÉA recognizes many similarities between Harry Potter and The Chymical Wedding of Christian Rosycross which he regards as one of the most profound spiritual works to have been written, next to the Bible. His ideas on the alchemy in Harry

Potter can be summed up in his statement: "Alchemy is a spiritual process converting the lead of the ordinary biological mortal human being into the gold of the divine, immortal and eternal human being who has overcome the limitations of death, evil and suffering." He has spoken at several international conferences for students of the deeper meaning in Harry Potter. He is currently working on a book The Gnosis in Harry Potter. www.HarryPotterForSeekers.com

ROBERT ALLEN BARTLETT began his alchemical study at the Paracelsus Research Society (later Paracelsus College) under the guidance of Dr. Albert Reidel (Frater Albertus). Robert's pursuit of alchemical research never

diminished, as he continued his chemistry career as a research scientist for new ceramic materials, then later as the Chemistry Department Manager for a large materials testing laboratory. He has produced two books, Real Alchemy, a Primer of Practical Alchemy, and his latest, The Way of the Crucible. Both books available at www.LuLu.com. www.RealAlchemy.org

RICKIE BYARS BECKWITH, a prolific composer, singer, performer, and music director, is widely known as an intuitive channel of healing music. Rickie's unique talents have brought her acclaim as a pioneer in spiritual music and have earned her an honorary

doctorate of music and numerous awards. She is the Musical Director of the Agape International Choir.

BARRY CARTER discovered the work of David Hudson on white gold and monatomic elements in 1995 and began experimenting and researching Hudson's ideas. He has since proven and developed Hudson's original theories into a much more

comprehensive and demonstrable science. Barry is also encouraging and coordinating research into the nature of the ORMUS materials, and has given scores of lectures on the subject around the world. www.subtleenergies.com/ormus/index.htm

DR. THOM CAVALLI (ph. d.) is a psychological alchemist, writer, artist and teacher. He is a licensed clinical psychologist and maintains a private practice in Santa Ana, California. Dr. Cavalli is author of Alchemical Psychology, Old Recipes for

Living in a New World and is currently under contract with Quest Publications to write an alchemical treatment of the Osiris myth. www.AlchemicalPsychology.com.
